

Master Reinforced Liner (No Stretch Liner Tube)

Master Reinforced Liner is a non-woven, needle punched fiber offered with Polyurethane coating. There is a reinforcement present in the felt to minimize longitudinal stretch during installation.

TECHNICAL DATA:

Coating: Polyurethane

Material: 100% Virgin Fiber with added Reinforcement

Installation: Inversion

Curing Methods: Ambient, Steam, Water, Light Cure

DIAMETER RANGE: 3" and larger

THICKNESS RANGE: 3mm and 4.5mm

AVAILABLE MANUFACTURED LENGTHS: 200' and 330' stock lengths (custom and longer lengths available)

APPLICATIONS: Open-End and Closed-End Reinforced Liner can go through 45° angles and long 90° angles with minimal wrinkling.

INSTALLATION AIR PRESSURE: 8 to 12 psi

CURING PRESSURE: 7 to 9 psi

STORAGE:

- Keep Rolls out of direct sunlight.
- Keep out of freezing temperature.
- Shelf life is 1 year plus if kept indoors in dark area.

AVOID:

- Do not place liner on bare floor.
- Do not place liner on blacktop.
- Always check the temperature of liner before impregnation (cure time will be effected if liner is too hot or cold)
