

## Master Straight Liner (Dry Inversion)

Master Straight Liner is a non-woven needle punched polyester fiber felt offered with Polyurethane coating. The Straight Liner has a stitched seam to ensure it can withstand pressure during installation and processing. This Liner is designed for straight shots. There is minimal longitudinal stretch.

### TECHNICAL DATA:

**Coating:** Polyurethane

**Material:** Polyester Felt

**Seam:** Stitched

**Curing Methods:** Ambient, Steam, Hot Water

**Resins:** Compatible with all Resins used for CIPP  
(we recommend our PDQ Resin when processing the Liner ambient temperature.)

**DIAMETER RANGE:** 3" to 96"

**THICKNESS:** 2.5mm to 43mm

**AVAILABLE LENGTHS:** Any Length

**APPLICATIONS:** MH to MTL

**INSTALLATIONS:** Refer to Heat Char / Cook Chart

### STORAGE:

- Avoid Freezing Temperatures.
- Keep out of Direct Sunlight.
- Keep Material / Pallets covered.

### AVOID:

- Do not place liner on bare floor.
- Do not place liner on blacktop.
- Always check the temperature of Liner before impregnation (cure time will be effected if liner is too hot or cold)
